MEMORANDUM FOR Service Members, Civilian Employees, and Family Members Residing in the 6th ASG Area of Responsibility

SUBJECT: 6th ASG Command Policy Letter 21, Safety

1. This policy letter applies to all 6th Area Support Group (ASG) assigned or attached personnel and organizations.
2. In all activities of the 6th ASG, the safety and health of our personnel, both on and off the job, must be paramount. Safety awareness and risk management at all levels of command are basic prerequisites for the prevention of accidental manpower, property and equipment losses. High levels of overall residual risks will be elevated to the 6th ASG Commander for decision. Extremely high levels of overall residual risks must be elevated for decision to the first general officer in the 6th ASG chain of command. Safety violations are non-negotiable.
3. Our goal of providing a safe and healthy working and living environment to all 6th ASG military and civilian personnel can only be achieved by leaders' and supervisors' direct involvement. We must constantly practice safety in every phase of our daily activities. Safety is a command responsibility and as the Senior 6th ASG Safety Officer, I expect all leaders to strictly comply with the enclosed Army in Europe Command Safety Policy Letter #3.
4. Safety means force protection, and it is essential to realize that an aggressive, comprehensive safety and fire prevention program is vital to the successful mission accomplishment and combat readiness of the 6th ASG. The prevention of accidents and fires continues to require the attention of all personnel. Leadership, example-setting by parents, dedication, and a commitment to excellence are attributes required to make our community a safe place for our service members, civilians, and families.
5. Point of contact for this policy is the Safety Office at DSN 421-2752.
